TECHNICAL SKILLS

- **Languages** – JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend** – React.js, Next.js (App Router, SSR/ISR), TanStack Query, Tailwind CSS, Ant Design
- **Charts & Real-time** – TradingView Charting Library, Chart.js, WebSockets
- **Performance & Quality** – Core Web Vitals, code-splitting, lazy loading, caching, accessibility (WCAG)
- **Cloud & Deployment** – AWS (S3, CloudFront, Route 53, Application Load Balancer, EKS, ECR, CodeBuild), Docker, nginx, Cloudflare CDN, CI/CD
- **Monitoring & Tools** – Grafana, OpenTelemetry, Git, Chrome DevTools, Postman

EXPERIENCE

Rupeezy (Fintech, Stock Broker) | Software Developer Mar 2026 – Present

- Upgraded the **TradingView charting engine from v26 to v32** (6 major versions behind) on the trading terminal serving **6,000–10,000 daily traders**. Fixed every breaking change while keeping existing workflows intact, and rolled it out in **7 staged pre-prod releases** with **zero disruption**.
- Cut 1-hour chart load time from **~1.6s to ~0.15s (~11x)** by switching to server-native intraday bars. Seconds charts went from **~40 sequential requests to one**.
- Contributed to the **KYC 2.0 revamp**, migrating account opening from **Angular 11 to React 19**, delivering a **13-step SEBI-compliant** onboarding flow with PAN and KRA auto-fill, selfie and e-sign, resume-from-last-step, and **instant-rollback releases on S3 + CloudFront**, aimed at lifting completion from **50% to 70%+**.
- Shipped and supported releases on **AWS**, with containerised Next.js apps built in **CodeBuild**, stored in **ECR** and deployed to **EKS** behind an **Application Load Balancer** and nginx. Static apps are served from **S3** through **CloudFront**, with **Route 53** DNS and environment-specific staging and prod builds.
- Implemented lead tracking and conversion improvements, lifting quarterly traffic-to-lead conversion to **2.08%** against a **1.8% baseline**.
- Working on the frontend for **FinAI**, Rupeezy's **in-house AI model**, built as a separate **frontend microservice** and integrated into the website and trading web app.
- Developed website pages and tools for mutual funds, brokerage calculators, market heatmaps, NSE pre-open, Stock SIP, F&O and IPOs in **Next.js**. Built **reusable components** shared by the website and the web trading app.
- Owned production reliability during market hours, covering pre-market checks, **Grafana** monitoring, root-causing production issues and shipping **hotfixes**.

Atomicwork | Frontend Developer Oct 2025 – Jan 2026

- Owned end-to-end delivery of the **Sandbox feature**, a secure, interactive environment where prospects explore the product hands-on.
- Upgraded Next.js to the latest version with **Turbopack** to improve development speed and build performance.
- Contributed reusable components to the frontend component library and shipped feature enhancements and UI updates across the product.
- Managed frontend state with **Zustand** and server data fetching and caching with **TanStack Query**.

Zithmi | Frontend Developer (Project-Based) Aug 2024 – Sep 2025

- Built the core of a **ride-hailing platform**, including a **real-time fare engine** with surge pricing, luxury tiers and location-based fees, plus automated **driver onboarding-to-offboarding** workflows and rider admin tools.
- Built a React internal platform with **Chart.js** visualisations for live monitoring of tasks, tickets, squad progress, member activity and operational metrics.
- Automated KYC using Dwolla payment authorisation and webhooks, delivering a **2-minute approval workflow** (validated in the Dwolla sandbox).

Fyle Technologies Pvt Ltd | Software Developer Intern May 2024 – Jul 2024

- Boosted the website's performance score by **35%** (PageSpeed Insights, GTmetrix) through CSS purging, lazy-loading below-the-fold content, **Webpack** tree-shaking and code-splitting, **nginx** caching and a **Cloudflare CDN**.
- Shipped **one-click switching between multiple accounts**, which brought back churned users and lifted positive customer reviews by **25%**.

PROJECTS

- **MemeDB** | Next.js, Firebase. A searchable library of **thousands of Tamil meme templates** organised by movie and actor, with trending and latest feeds, in-browser editing, download and share, and **server-rendered, SEO-friendly** template pages.
- **TaskBuddy** | React.js, Node.js, Express.js, MongoDB. A **full-stack** task manager with **Google sign-in**, advanced filtering, and list and board views.

EDUCATION

- Master of Computer Applications, SRM Institute of Science and Technology
- Bachelor of Computer Applications, University of Madras | 2022
